

While you always have the option of selecting your own pharmacy for these services, many good reasons exist for using the pharmacy that is preferred by your care provider.

Safety

If you take medications prescribed by more than one physician, or even multiple medications prescribed by the same physician, there is always the possibility that an adverse drug reaction could occur. In other words, a medical problem could arise when two or more medications have been prescribed that should not be used together. The best way to avoid such problems is to have a single pharmacy provide all of your prescriptions. The pharmacist then becomes familiar with your medications and can employ his or her expertise to monitor your medication use, thus limiting or preventing any problems from occurring with your unique set of medicines.

Packaging

AmeriPharma offers a variety of medication packaging options to satisfy specific needs of patients, facilities, and prescribers. These are intended to benefit patients of all age groups and health conditions by promoting compliance and convenience. Packaging options include, but are not limited to:

- *Blister packs
- *Vials
- *Compliance packs
- *Proprietary MedBox

Billing

AmeriPharma offers competitive pricing for the many special services provided to you. You will be able to understand and manage your pharmacy costs better when you receive one bill per month from the preferred pharmacy for all of your medications and supplies. Call our billing representatives anytime you have concerns or questions.

Delivery

AmeriPharma makes regular free deliveries so that you and/or a family member will not have to go to the pharmacy to wait for your prescriptions to be filled. Deliveries always are planned so that you will not run out of medications.

Emergency

In the unlikely event that you have a medical emergency, it is critical that the ambulance personnel, the assisted living staff, and the doctors at the emergency room know exactly what medications you are taking. Our preferred pharmacy makes this information readily available in the assisted living community's records.

Pharmacist Services

Our Clinical Pharmacist's are available 24/7 for video consultation from your home. They understand the Medicare Part D program and are here to support and advise on the various plans available. We actively enroll patients into Patient Assistance Programs when medications costs are not affordable.
